MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Trash Disposal Restrictions on Chievres Air Base and Caserne Daumerie

1. The 80th Area Support Group (NSSG) provides trash containers and dumpsters on Chievres Air Base and Caserne Daumerie for the disposal of waste generated by official activities of the U.S. Forces. Since a government-paid contractor performs the removal of waste from these containers, the disposal of household waste in these containers imposes additional costs on the U.S. government.
2. The disposal of household waste in government trash containers and dumpsters on Chievres Air Base and Caserne Daumerie is prohibited. For military personnel, this policy constitutes an order prohibiting such improper disposal, the violation of which is punishable under Article 92 of the UCMJ (violation of a lawful order). For civilian employees of the U.S. Forces, improper disposal of household waste on post may result in disciplinary action under appropriate civilian personnel regulations. For dependents of military or civilian personnel, improper disposal may be grounds for administrative action under UR 27-9, the civilian misconduct regulation.
3. Household waste is defined as any item for disposal that is personal in nature and not generated on the installation, including trash, garbage, garden trimmings, packaging and recycling material.
4. The preferred method for disposal of household waste is the trash service provided by the local commune. Recycling can be accomplished by using the door-to-door pick up service provided by the communes, by taking recyclables to one of the local container parks (recycling centers) provided by the commune, or by using the SHAPE recycling center. Household hazardous waste (flammable, corrosive, reactive, or toxic) can also be taken to the container parks. Information on location and opening hours of the different container parks can be found at building 25 (Self-Help store).
5. Point of contact is Mr. Edwin Paquet, DSN 361-5894.
